

Important Lipstick & Lip Blushing Information

Remember- everyone heals differently. All permanent makeup results vary from person to person.

Your lips will be swollen, bruised, tender, and darker in color directly after your procedure. This typically lasts a few days. This can be reduced by applying a clean, covered bag of ice over the treatment area in 10 minute intervals.

*Inflammation is part of the healing process and is necessary for proper color retention.

Exfoliation of the lips will occur over the next week. DO NOT PICK OR PULL AT LOOSE SKIN!

Lipstick & Lip Blushing Post-Treatment Instructions

Day 1... Wipe the lips with a moistened cotton round (provided) every 30 minutes for the next 4 hours to remove any lymph and blood. This will prevent forming of scabs. After dry, apply post care balm (After Inked) with CLEAN HANDS to keep the lips hydrated.

Day 2... Wipe the lips 4-6 times a day with a cotton round moistened with filtered or distilled water and keep them hydrated with post care balm.

Days 3-7... Wipe the lips in the AM and PM and keep them protected with a good UV Lip Balm (spf 15-30). By then the lips will be fully exfoliated.

*Always keep lips protected with a UV lip balm once healing process is over
